SEARS-P Scale Overview

The SEARS-P is a strength-based, multidimensional measure of a child's or an adolescent's social strengths and resilience from the perspective of a parent or other caregiver. The SEARS-P consists of 39 items covering the following three scales:

- The **Self-Regulation/Responsibility (SR/R)** scale measures self-awareness, meta-cognition, intrapersonal insight, self-management and direction, and the ability to accept responsibility and think before acting.
- The **Social Competence (SC)** scale measures the ability to maintain friendships with peers, engage in effective verbal communication, and feel comfortable around groups of peers.
- The **Empathy (E)** scale measures the ability to understand and relate to others' situations and feelings.
